

ABOUT

Interested in a career as a front-end developer and looking for opportunities to increase my experience in this field.

Completed 1 year of Systems Analysis and Development courses at FIAP in São Paulo, Brazil in 2021-2022.

Spent 1 year self-learning front-end developer skills such as creating interfaces using HTML, CSS, bootstrap, JS, programming logic, etc.

In 2023, I moved to South Korea to enroll in HangHae 99 Academy's Front-End Development Bootcamp and completed the course in July 2023.

EDUCATION

FIAP 2021.01-2022.01

Associate of Applied Science (AAS)

Systems Analysis and Development (São Paulo, Brazil) - Leave of Absence

HANGHAE99 ACADEMY 2023.04-2023.07

Front-End Development Bootcamp

3 months coding bootcamp that focuses on learning algorithmic skills, web development, and collaborative teamwork through team-based projects.

EXPERIENCE

VERGEOS 2023.03-2023.04

Global Service & Marketing/Publishing Agency - Product Manager

- Service operation and customer support for mobile games
- KR to PT translation for MIR Trilogy game
- International team management and communication

INTERPAC TRAVEL 2015.12-2020.04

Travel Agency - Travel Consultant

- Travel management for expatriate and employee
- VIP Event Management
- Hyundai Motor Brazil (HMB) VIP Protocol
- 2016 Summer Olympics Games - Korean Archery Association National Team Interpreter

PROJECTS

STUDYHUB

2023.05.19 - 2023.06.30 - Team Project

It's an online study platform where individuals with common goals motivate and assist each other in studying together.

- Implemented User Registration/Login

Validated nickname, email, and password fields. Processed user information data and communicated with the server via API. Managed tokens using Axios interceptors and implemented user authentication with refresh token for access token reissue.

- WebRTC (OpenVidu)

Implemented video chat functionality using the OpenVidu library.

- Socket, Stomp

Implemented real-time chat functionality for exchanging data with the server in real-time.

Tech Stack: ReactJS, Styled-Components, Axios, React-Query

GitHub: StudyHub Repository

STARCRAFT CHATTING

2023.05.12 - 2023.05.18 - Team Project

Real-time chat feature inspired by the StarCraft game chat

- Socket, Stomp

Real-time chat feature enabling data exchange between the server and users. Distinguishing sent messages from both myself and the other party using colors. Implementation of chat entry/exit notification messages. Real-time online user tracking.

Tech Stack: ReactJS, Styled-Components, Socket, Stomp

GitHub: StarCraft Chatting Repository

PERSONAL PORTFOLIO

2022.06 - 2022.07 - Personal Project

This is a multi-page application developed using HTML, CSS, and JavaScript. I created this project to test my skills while studying on my own.

- HTML

Coded as semantically as possible to ensure web accessibility, search engine optimization (SEO), and maintainability.

- CSS

Used BEM methodology to define classes and created a responsive web page structure.

- JavaScript

Implemented a dynamic website to showcase my personality, incorporating various animations and user interactions through buttons. Visual effects like Parallax scrolling. Logo blinking animation effect, logo image change on clicking the Power Button and a custom cursor that follows the mouse pointer.

Tech Stack: HTML, CSS and JS

GitHub: Personal Portfolio Repository

SKILLS

Front End

HTML, CSS, JavaScript, TypeScript, ReactJs, Tailwind, Styled-components, REST API, Git

Design Tools

Adobe Photoshop, Adobe Premiere, Figma
